RE: FERVO Cape Modern Geothermal Exploration Project

To Whom It May Concern:

The City Council of Milford, Utah, would like to thank you for the opportunity to comment on the proposed FERVO Cape Modern Geothermal Exploration Project and would like to go on record as being adamantly in support of this proposed project.

The City of Milford has a population of approximately 1,500 people, an airport, hospital, library, outdoor swimming pool and a five-hole golf course and a 24 member volunteer fire department. Our community is made up of citizens of many walks of life and religions. Our goal is to keep going forward and prospering; we feel that FERVO would be a great asset to the Milford Valley.

FERVO has been to multiple City Council Meetings to present their proposed project, which has provided Milford City with knowledge and understanding for this project. We have spent countless hours reviewing this project in depth and feel this project would be very beneficial to Milford City as well as Beaver County. Our main goal is to keep the quality of life in the Milford Valley and FERVO is a great fit to obtain this goal.

As you may be aware, Smithfield Foods announced in June 2022 that they would be decreasing its operations in Milford, Utah. This announcement caused devastation to our town, but it will also be affecting many of our families and friends in the near future. We are in hopes that the FERVO Project will be able to provide jobs to help families during the transition of the reduction at Smithfield.

We appreciate you allowing for public comment and it is our sincere hope that the BLM supports this project. Should you have further questions, please feel free to reach out to me at ndavisfiredist2@hotmail.com or at 435.691.9111.

Sincerely,

Nolan C. Davis
Mayor, City of Milford
